

ZOOM H5

Handy Recorder - 4 track

Order code: FXR005

RRP: ~~\$589.00~~

Our Price: \$395.00

Zoom H5 handy recorder picks up where the popular H4 started, without the extra channel the flagship H6 recorder.

H5 features the same ability to interchange capsules as seen on H6. The standard microphone set that comes with H5 is the newly designed XYH-5 X/Y microphone capsule.

It comprises two matched cardioid condenser microphones set at 90 degrees. They are housed in a shockmount that employs rugged external micro-rubberised material to isolate the unit from the minimising vibration and handling noise.

Flexible and powerful, H5 provides everything you need to create multitrack recordings, audio for video, state-of-the-art podcasting, broadcasting and newsgathering.
