

RYCOTE LAV WINDJAMMER PAIR

Lavalier Windjammer (Pair) BLACK

Order code: 065501

RRP: \$63.00

Lavalier Windjammer - Black (Pair)

Suited to a variety of miniature lavalier microphones, the Lavalier Windjammer is used in the outdoor environment, to negate the effect of wind.

It is the most heavy-duty of Rycote's subminiature Lavalier microphone products, suitable for use in outdoor interview conditions. Lavalier Windjammer greatly reduces microphone noise and clothing rustle while also providing effective wind protection. Use the 'plain' foam insert for use with most lavalier microphones, or for very small lapel mics, the windjammer with a rubber ring offers a more precise fit. Simply slip the windjammer (furry) over the top of the foam insert and you'll end up with somewhere between 12-15dB of attenuation (depending on microphone specifications).

For a less obtrusive alternative, check out the hairless Ristretto Windjammer.

Lavalier Windjammer is suitable for: Microphone Diameters: 4.5 mm Microphone Length (up to 100 mm)
