

QSC K8.2

Active 8" Loudspeaker (2000w) with DSP and wedge tilt

Order code: K8.2

RRP: \$1,249.00

Our Price: \$1,099.00

After such a long stint as one of the truly great performers in the 'compact powered speaker' QSC K-series has had a huge makeover.

To quote QSC: "K.2 Series is quite simply, the standard in powered loudspeakers"

In this, the smallest member, we're particularly interested in the K8.2 shape - with its ability to sit perfectly in monitor wedge position. This is true for the K10.2 and K12.2 shapes. A number of acousticians will love this feature!

Other new highlights to the K.2 Series include: Each model is equipped with a 2000-watt power supply carefully matched to high-performance woofers and compression drivers. DMT (Directivity-Transition) ensures smooth coverage across the listening area. Advanced on-board DSP provides Intrinsic Correction voicing and advanced management to further optimise performance. K8.2 weight: 12.2 kg K8.2 Nominal Coverage: 105°; Axisymmetric
