

NEUMANN KMS105-BK

Live Supercardioid Vocal Condenser (Black)

Order code: KMS105BK

RRP: ~~\$959.00~~

Our Price: \$715.00

If you want to be the best, then use the best. Supercardioid condenser with 4 stage mesh grille. Don't buy another vocal mic without trying this full frequency response from the brilliant and right down through the full mids and fat bottom. Since vocal microphones are typically address close range, for the bass frequency response microphones, electronic compensation is used to use proximity effect in the respective capsules. In addition, the microphone has an invariable, high-pass filter with a cutoff frequency of 120 Hz. The dynamic range of the KMS microphones is 130 dB. The maximum sound pressure level is 150 dB.
