RRP: ~~\$884.00~~

**Our Price: \$789.00**

Bundle: M160 hypercardioid ribbon mic with INV-7 suspension

For a limited time, here's a great bundle. The M160 ribbon microphone from Beyer is a bit of an all-rounder, being great for guitar cabs, vocals and all kinds of instruments.

As an added bonus, it's one of the most popular stage ribbon mics we've ever come across. Hypercardioid, end-address, and full of rich sound capture.

Stick your M160 in the super-popular Rycote INV-7 shockmount, and it's a match made... well, a match made right here at Factory Sound.

The INV-7 shock mount has been hugely popular in studio overheads, such as Neumann KM184, and it works an absolute treat for M160

Grab these bundles before they're all gone!
