Audio Recorder, Mixer, USB Audio Interface

Order code: MIXPRE-6

RRP: \$1,602.00

Our Price: \$1,569.00

6 input, 8-track audio recorder w/mixing and USB interface

Like all of the MixPre series, MixPre-6 is a lightweight, high-resolution audio recorder with integrated audio streaming that offers world-class sound combined with extreme durability. It's perfect for musicians, sound designers, podcasters, videographers, YouTubers and field recordists.

MixPre-6 features Sound Devices' Kashmir microphone preamps. These high-performance, ultra-low-noise, discrete, Class A preamps were hand-crafted by Sound Device Kashmir mic preamps feature a -130dBV noise floor, analog limiters, and new 32-bit A-to-D converters ensure the highest quality audio recordings that surpass those of other recorders using simple shelf IC-based mic preamps.

The small stature and design of the MixPre-6 make it a perfect fit for your production environment. It features a responsive capacitive touch screen for incredibly simple and intuitive operation, and a bright, IPS technology, sunlight-readable colour LCD for the ultimate in convenient navigation.

As an added benefit to DSLR users, the MixPre-6 has a retractable 1/4"-20 mounting capacity making it a perfect pairing for a wide variety of cameras. This design allows for solid, low-profile tripod/camera mounting.

Because the male and female 1/4"-20 threads are captive, they cannot be lost and are always available.
