

## NEUTRIK NAC3MX-W-TOP

powerCON TRUE1 - male cable connector, IP65

Order code: NAC3MX-W-TOP

RRP: ~~\$13.90~~

**Our Price: \$10.80**

When Neutrik took things up a notch with their powerCON range and first introduced TRUE1 of boxes were ticked, in a big way:

TRUE1 powerCON is IP65 rated (when in the state), can be mated or broken under load, and a full range of male and female line and panel connectors - making connectivity and extension to achieve.

The latest incarnation is NAC3MX-W-TOP, which signifies True Outdoor Protection. In other words, "these ruggedised sealed connectors feature protection but also UV resistance approved at UL50E"

ALL BLACK - we thought the original TRUE1 with its nice bright yellow trim, looked quite thin. This new 'TOP' version is all black. It's probably for the back of your devices, and who are we anyway!

NAC3MX-W-TOP is a locking male cable connector with screw terminals. As with all power, a male connector is used to accept power flow.

Need some pointers for assembly? Click on the 'data' tab below to open (or download) the Neutrik assembly pdf for NAC3MX-W-TOP
