

## PIONEER PRO DJ PLX1000

High Torque Direct Drive Turntable

Order code: PLX1000

RRP: \$1,199.00

**Our Price: \$1,075.00**

Whether you've got some tired, worn out decks that need replacing - or you'd simply like to upgrade, Pioneer has come out with the new standard in turntables. The PLX-1000 high-torque direct drive turntable is built with a classic layout and a rubber-lined, S-shaped slipmat that improves isolation and prevents feedback. It's solidly built for excellent vibration damping and provides precise, high grade audio playback.

"Hello Torque" The high-torque direct drive motor means that your tracks reach a rotation speed of 33rpm in merely 0.3 seconds thanks to a starting torque of 4.5kg/cm (or more). On top of that it ensures precise rotation and exceptional control. Check the video tab below for a the overview of the Pioneer Pro DJ
