

RADIAL PRORMP

Passive Re-Amping Box

Order code: PRORMP

RRP: ~~\$209.00~~

Our Price: \$165.00

Everybody's doing it...re-amping is the not-so weapon in a bunch of studio's bags of tricks. (not only can you output your recorded guitar to your favourite amp (re-amp), but also vocals, bass, drums, percussion...you get the picture.

Take a balanced cable from your computer (or mixer), connect it to the PRORMP input. It will match impedance and eliminate ground loops on the line going to your amp. Now you can re-record with any tonal dial in. Sweet.
