

## REFERENCE SPK4-2P-V

Speakon speaker lead, 2 x 2.5mm cable - 4m

Order code: SPK4-2P-V

**RRP: \$59.00**

Speaker cable, made with all the right components.&nbsp;

Get the amplifier juice squirting all the way to speakers, with minimum resistance. We have Van Damme cable for the job - their Black Series Grade 2x 2.50mm cable is flexible, has a size (7.6mm), and 50 x 0.25mm conductor strands. There is no other choice than genuine Neutrik for the job. We have selected the old faithful N this application, but be aware that it's wired for passive' speaker operation (ie: 1+ / 1-).&nbsp; Should you require a cable specifically built for or perhaps a true 4-conductor speaker cable (8 way), get in touch and we'll either make it for the very least hook you up with the best component the job.

Length: 4m
